Healthcare Crisis Demands Solutions

■ DIABETES

■ ASTHMA

■ CHF

■ COPD

In the U.S. alone,
133 million people –
45% of the population
have at least
1 chronic disease

Increasing by 10% per year.

Of these, about
60 Million could
benefit from some
form of Remote
Health Monitoring

U.S. sales of wireless
home-health technology
is expected to soar from
\$300 Million in 2009 to
\$4.4 Billion by 2013

In 2010 the global **m-Health**
market is expected to exceed
\$50 Billion

It is predicted remote health
monitoring could **save \$175**
to \$200 billion per year in
global chronic disease
management

The Need to Target Healthcare Dollars Wisely

The most chronically ill **5%** of people in the U.S. account for **50% of the total healthcare costs.**

The Healthiest make up just 3.4%.

Source:

• Health Care Costs: A Primer – Key Information of Healthcare Costs and Their Impact, Henry J. Kaiser Family Foundation, March 2009

The Unique Challenges of Rural Healthcare

- Limited Staff / Personnel to Cover a Greater Physical Area
- Remote Locations / Long Distances Make In-Office Visits Difficult
- Dispatching Resources to Patient Locations is Inefficient
- Because of the Distance and Time, Patients Tend to Wait Until the Problem Manifests

Opportunities

- The growth rate of the home healthcare and disease management markets are expected to increase to 25 percent in 2010 and will remain steady over the following five years, according to the firm.
- The number of gateways used in telehealth applications will increase to more than 1 million in 2014 and to about 3.6 million in 2018.
- The number of machine-to-machine and embedded devices worldwide will increase to nearly 412 million by 2014. Juniper believes that the healthcare vertical could drive the growth spurt for M2M over the next few years.

The Ultimate Goal
Is To Stay
Connected With A
Patient To Keep
Them Healthy And
Out Of The ED
And Hospital

Reducing
Healthcare
Costs

The Exam Room of the Future Is Anywhere the Patient is Located

Staying Connected Improves Patient Outcomes and Reduces Costs

“HealthCare Anywhere”

Benefits of Remote Health Monitoring

- Reduce the Need for In Office Visits
- Enable Fewer Physicians to Provide Care to a Larger Number of Patients
- Reduce Hospitalizations, Readmissions and ER Incidents
- Shorten the Length of Expensive Hospital Stays
- Extend the Period of Independent Living for Seniors Outside of Nursing Homes
- Eliminate Unnecessary Exposure of Well Patients to Infections in Hospitals and Clinic Settings
- Eliminate Unnecessary Transportation (Providing a More “Green” Solution)

MedApps Value Proposition

- **Reduce Unnecessary Hospitalizations, ER, Home Visits**
Remote Data Collection / Near Real-time Feedback
- **Minimize Costs and Maximize Resources**
Ability to Serve More Patients / Increase Staff Efficiency / Lower Re-admissions
- **Help Reduce Advancement to More Severe Disease States**
Proactive vs. Reactive / Watch Trends / Stay Ahead of Disease
- **Lower Cost to Deploy & Maintain**

**Payers / Providers /
Disease Management**
